## PROFESSIONAL SUMMARY

Senior backend-focused software engineer with 5+ years of experience building Java/Spring Boot microservices, event-driven integration workflows, data pipelines, and cloud-native applications. Strong match for Real's Java backend platform needs through hands-on work with JMS, Apache Artemis, ActiveMQ, Spring Data JPA, SQL optimization, AWS, Docker, OpenShift, Jenkins, testing standards, code review, and production debugging. Practical builder who can mentor engineers, improve maintainability, and validate AI-assisted development work before it reaches production.

## CORE COMPETENCIES

Java / Spring Boot

Event-Driven Microservices

Spring Data JPA

SQL Optimization

AWS

Docker / OpenShift

Jenkins CI/CD

Testing Standards

Code Review

Production Debugging

## WORK EXPERIENCE

### NTT DATA

September 2021 - Present

#### Senior Software Developer

- Design and develop event-driven Java/Spring Boot microservices using JMS, Apache Artemis, ActiveMQ, and enterprise integration patterns to improve operational efficiency.
- Automate CI/CD pipelines and cloud deployments with OpenShift and Jenkins, improving deployment efficiency and operational reliability.
- Author and advocate team coding standards and testing best practices, improving code quality, maintainability, and production readiness.
- Lead code reviews, mentor junior developers, debug production issues, and deliver cross-application backend solutions.

### Sikka Software Corporation

July 2021 - September 2021

#### Full-Stack Developer

- Enhanced Dental Practice Optimizer KPIs and reports, improving compatibility with practice management systems and multi-source reporting workflows.
- Integrated Sikka ONE API into cloud platforms, supporting reliable functionality across multiple data sources.
- Migrated user interfaces to React.js, delivering responsive and accessible applications compliant with WCAG standards.

### iLab @ Computer Science, CSUEB

May 2020 - May 2021

#### Graduate Research Assistant

- Designed an AI-driven COVID-19 risk assessment system achieving 85% accuracy in crowd density, mask usage, and fever detection analysis.
- Enhanced backend architecture and documentation, improving troubleshooting and development workflows.
- Deployed a crowd density estimation system using Firebase, Java, Python, and Flask, improving Android model deployment efficiency by 7%.

### Glint Logic

July 2017 - August 2019

#### Software Engineer

- Built scalable full-stack web applications with Spring Data JPA and React.js.
- Optimized database performance and retrieval speed by tuning SQL queries, adding indexes, and improving schema design.
- Conducted impact analysis across multiple applications and validated unit tests against acceptance criteria to ensure production readiness.

## EDUCATION & CERTIFICATIONS

**Master of Science, Computer Science** | August 2019 - May 2021

**Bachelor of Engineering, Computer Engineering** | August 2015 - June 2019

- Continuous Delivery for Cloud Native Java Apps
- AWS for Developers: RDS MySQL Database with Lambdas
- AWS Developer Associate: Cloud Services
