PROFESSIONAL SUMMARY

Senior backend-focused software engineer with 5+ years of experience building Java/Spring Boot microservices, event-driven integration workflows, data pipelines, and cloud-native applications. Targeted for Affirm's Senior Software Engineer, Backend (Infrastructure) role through hands-on work with JMS, Apache Artemis, ActiveMQ, Spring Data JPA, SQL optimization, AWS, Docker, OpenShift, Jenkins, testing standards, code review, mentoring, and production debugging.

CORE COMPETENCIES

SQL distributed systems AWS Kubernetes Python Go remote-first Affirm

WORK EXPERIENCE

NTT DATA

September 2021 - Present

Senior Software Developer

- Design and develop event-driven Java/Spring Boot microservices using JMS, Apache Artemis, ActiveMQ, and enterprise integration patterns.
- Automate CI/CD pipelines and cloud deployments with OpenShift and Jenkins, improving deployment efficiency and operational reliability.
- Author and advocate team coding standards and testing best practices, improving maintainability and production readiness.
- Lead code reviews, mentor junior developers, debug production issues, and deliver cross-application backend solutions.

Sikka Software Corporation

July 2021 - September 2021

Full-Stack Developer

- Enhanced KPI and reporting workflows, improving compatibility with practice management systems.
- Integrated Sikka ONE API into cloud platforms across multiple data sources.
- Migrated user interfaces to React.js, delivering responsive and WCAG-compliant applications.

iLab @ Computer Science, CSUEB

May 2020 - May 2021

Graduate Research Assistant

- Designed an AI-driven COVID-19 risk assessment system achieving 85% accuracy.
- Enhanced backend architecture and documentation for troubleshooting and development workflows.
- Deployed a crowd density estimation system using Firebase, Java, Python, and Flask, improving Android model deployment efficiency by 7%.

Glint Logic

July 2017 - August 2019

Software Engineer

- Built scalable full-stack applications with Spring Data JPA and React.js.
- Optimized database performance by tuning SQL queries, adding indexes, and improving schema design.
- Conducted impact analysis and validated unit tests against acceptance criteria.

EDUCATION & CERTIFICATIONS

Master of Science, Computer Science | August 2019 - May 2021

Bachelor of Engineering, Computer Engineering | August 2015 - June 2019

- Continuous Delivery for Cloud Native Java Apps
- AWS for Developers: RDS MySQL Database with Lambdas
- AWS Developer Associate: Cloud Services
